

**Amendments to the Specification:**

Please replace the abstract with the following replacement abstract:

-- Input is received that identifies a broadcasted program. Content is selected, based on the input, to be displayed in a background area of an interactive programming guide. Content may be selected based on a category of the broadcasted program. Content selection may further be conditioned on an elapsed time interval. --

Please replace paragraph [0001] beginning on page 1 with the following replacement paragraph:

-- The present application claims priority to the provisional filed application entitled Dynamic, Context-Related Generation and Modification of IPG Backgrounds, filed on Mar. 2, 2001, Ser. No. 60/273,101, which is also incorporated herein by reference. The present application is related to the applications titled METHOD AND SYSTEM FOR CONTENT-BASED BROADCASTED PROGRAM SELECTION, filed on Nov. 30, 2001, Ser. No. 10/008,229; and METHOD AND SYSTEM FOR ADVERTISING BASED ON THE CONTENT OF SELECTED CHANNELS OR BROADCASTED PROGRAMS, filed on Feb. 27, 2002, Ser. No. 10/085,886. --
